

Co-Founder Matching Request ~ BluPower

About the Start-up:-

BluPower is a clean energy start-up developing ultra-low-head, site-specific, plug-and-play hydroelectric modules focusing on the small hydropower market worldwide

This is our Website: <https://www.blupower.in/>

Here's the YouTube Channel: <https://www.youtube.com/channel/UCBqBgvMHv8KRsUKZjqYoHA>

We are also on LinkedIn: <https://www.linkedin.com/company/blupowerhydro>

Whom we're looking to connect to:-

Passionate, ambitious, talented, knowledgeable individuals with a creative mind-set willing to build products from the ground up. Interested individuals should have a [deep zeal to fight against climate change](#) with a “do whatever it takes” attitude to ensure sustainable development on the Kardashev Scale. Preferences include, recent would be graduates/post-graduates preferably from technical backgrounds including Data Science/Quantum Computing/Energy Science/Electrical and Mechanical Engineering. The work would require (amongst other things) research, designing and testing the technologies to be used in the product as well as business analysis; and the individual shall have to wear multiple hats (take various challenging, tough and important decisions in unique roles).

Commitments:-

Since we are looking to develop the founding team, full time commitment is preferred. The founding team should be passionate and hack together from scratch on the white board; sharing beliefs, accountability and responsibilities including manufacturing the designed prototype and developing the presently underdeveloped market. In case the candidate is part-time, she/he shall be considered to be part of the founding team once they finish their ongoing studies & coursework or thesis submissions. Once we explore synergies we shall discuss about compensation, benefits and develop respective vesting schedules as per contributions to the startup's progress.
